Subject Index of Volume 67

Absorption spectra
  experimental and INDO CI calculations of the electronic absorption spectra of acridine and 9-acridinamine free bases and their protonated forms with regard to tautomeric phenomena, 287
  spectroscopic and electrochemical properties of Pt(II) complexes with aromatic terdendate (C^N^C) cyclometallating ligands, 173
  transient absorption spectra of aromatic radical cations in hydrocarbon solutions, 197
Acetoxyisopiperitenone
  kinetic study of the direct and photosensitized photoisomerization of acetoxyisopiperitenone: solvent effect and evaluation for the photochemical storage of light energy, 41
9-Acridinamine
  experimental and INDO CI calculations of the electronic absorption spectra of acridine and 9-acridinamine free bases and their protonated forms with regard to tautomeric phenomena, 287
Acridine
  experimental and INDO CI calculations of the electronic absorption spectra of acridine and 9-acridinamine free bases and their protonated forms with regard to tautomeric phenomena, 287
Acrylonitrile
  alternating phototerpolymerization of zinc acrylate, styrene and acrylonitrile initiated by the As_2S_3–styrene complex, 363
Amines
  ground state and excited state association: chiral recognition between 2,2′-dihydroxy-1,1′-binaphthyl and amines, 209
Amino group
  photophysical study of some indole derivatives, 301
Anthraquinone-2-sulphonate
  reduction of dioxygen to superoxide photosensitized by anthraquinone-2-sulfonate, 187
Aromatic hydrocarbons
  intrazeolite photochemistry
  laser photolysis of stilbene and some aromatic hydrocarbons in the cavities of NaX zeolite studied by time-resolved diffuse reflectance, 91
Aromatic radical cations
  transient absorption spectra of aromatic radical cations in hydrocarbon solutions, 197
Aromatic terdendate
  spectroscopic and electrochemical properties of Pt(II) complexes with aromatic terdendate (C^N^C) cyclometallating ligands, 173

Benzophenone triplet
  nonradiative decay lifetime standards, 167
Benzoquinone
  photoinduced electron transfer via benzoquinone as evidenced by chemically induced dynamic nuclear polarization, 279

Cage effects
  competition between δ-hydrogen abstraction and cage effects in the photochemistry of *o*-methyl dibenzyl ketone in various environments, 57
Carbocation
  photosolvolysis of 5-substituted dibenzosuberol derivatives: a stereoelectronic requirement for carbocation photogeneration, 33
Carbon dioxide
  photochemical reduction of carbon dioxide by trichlorobis(2,2′:6′,2″-terpyridyl)vanadium(III) and methyl viologen, 67
  photofixation of carbon dioxide by a hydroxo-oxobis(8-quinolyloxo)-vanadium(V)–MV^{2+}–ethylendiaminetetraacetic acid dispersion system, 329

Carbon tetrachloride
photopolymerization of methyl methacrylate in carbon tetrachloride solution using 4-isopropyl-4′-*N*,*N*-dimethylaminobenzophenone as chromophore, 353
Chemiluminescence
chemiluminescence in the gas phase reaction between tetrakis (dimethylamino) ethylene and oxygen, 1
luminol chemiluminescence in micellar media, 237
Chiral recognition
ground state and excited state association: chiral recognition between 2,2′-dihydroxy-1,1′-binaphthyl and amines, 209
Chloro-aliphatics
degradation of some chloro-aliphatic water contaminants by photocatalytic membranes immobilizing titanium dioxide, 109
Chromophore
photopolymerization of methyl methacrylate in carbon tetrachloride solution using 4-isopropyl-4′-*N*,*N*-dimethylaminobenzophenone as chromophore, 353
Colloid stabilizer
effects of colloid stabilizer and pH on photoinduced electron transfer from colloidal titanium dioxide to methylviologen, 101
Coloured merocyanine
low temperature luminescence study of the colored merocyanine form of substituted 6-nitrobenzospiropyrans, 319
Contamination
degradation of some chloro-aliphatic water contaminants by photocatalytic membranes immobilizing titanium dioxide, 109
Copper
photo-oxidation of propionic acid by oxygen in the presence of TiO_2 and dissolved copper ions, 337
Cyanine dye
spectral sensitization of a semiconductor by mixtures of aggregated cyanine dyes: photoelectrochemical study, 377
Cyclic α,β-unsaturated ketones
stereoselective photodimerization of $SnCl_4$ complexes of cyclic α,β-unsaturated ketones in the solid state, 51
Cyclometallating ligand
spectroscopic and electrochemical properties of Pt(II) complexes with aromatic terdendate (C^N^C) cyclometallating ligands, 173
Cytotoxic pyronins
kinetics of the hydrolysis of cytotoxic pyronins in micellar systems, 75

Decay lifetimes
nonradiative decay lifetime standards, 167
Depside
solubilization and photophysical and photochemical behaviour of depsides and depsidones in water and Brij-35 solutions at different pH values, 245
Depsidone
solubilization and photophysical and photochemical behaviour of depsides and depsidones in water and Brij-35 solutions at different pH values, 245
Dibenzosuberol derivative
photosolvolysis of 5-substituted dibenzosuberol derivatives: a stereoelectronic requirement for carbocation photogeneration, 33
2,2′-Dihydroxy-1,1′-binaphthyl
ground state and excited state association: chiral recognition between 2,2′-dihydroxy-1,1′-binaphthyl and amines, 209
Dioxygen
reduction of dioxygen to superoxide photosensitized by anthraquinone-2-sulfonate, 187

Electrochemical behaviour
spectroscopic and electrochemical properties of Pt(II) complexes with aromatic terdendate (C^N^C) cyclometallating ligands, 173
Emission lifetime
spectroscopic and electrochemical properties of Pt(II) complexes with aromatic terdendate (C^N^C) cyclometallating ligands, 173
Emission spectra
spectroscopic and electrochemical properties of Pt(II) complexes with aromatic terdendate (C^N^C) cyclometallating ligands, 173
EPCP
photophysical properties and photo-oxygenation of 2-(4-ethoxycarbonyl-

phenyl)-1,8-dihydropyrrolo[3′,2′:3,4]-cyclopenta[1,2-b]pyridine (EPCP), 227
Ethane-bridged dimeric bipyridine
photophysical studies on a series of new ethane-bridged dimeric bipyridine ligands, 311
Ethyl acetate
flash photolysis of pyridinium di-μ-oxo-bis(oxo tris(isothiocyanate)-molybdate(V) in ethyl acetate, 267
Excited state
ground state and excited state association: chiral recognition between 2,2′-dihydroxy-1,1′-binaphthyl and amines, 209

Flash photolysis
flash photolysis of pyridinium di-μ-oxo-bis(oxo tris(isothiocyanate)-molybdate(V)) in ethyl acetate, 267
Fluorescence quantum yields
photophysical studies on a series of new ethane-bridged dimeric bipyridine ligands, 311
Fluorescence spectra
fluorescence spectroscopic study of chemically and photochemically treated high-yield pulps, 117
Franck–Condon state
photophysical properties and photo-oxygenation of 2-(4-ethoxycarbonyl-phenyl)-1,8-dihydropyrrolo[3′,2′:3,4]-cyclopenta[1,2-b]pyridine (EPCP), 227

Gas phase reaction
chemiluminescence in the gas phase reaction between tetrakis (dimethyl-amino)ethylene and oxygen, 1
Ground state
ground state and excited state association: chiral recognition between 2,2′-dihydroxy-1,1′-binaphthyl and amines, 209

High-yield pulps
fluorescence spectroscopic study of chemically and photochemically treated high-yield pulps, 117
Hydrocarbon solutions
transient absorption spectra of aromatic radical cations in hydrocarbon solution, 197
δ-Hydrogen abstraction
competition between δ-hydrogen abstraction and cage effects in the photochemistry of *o*-methyl dibenzyl ketone in various environments, 57
Hydrolysis
kinetics of the hydrolysis of cytotoxic pyronins in micellar systems, 75

Indole derivative
photophysical study of some indole derivatives, 301

Kinetics
kinetics of the hydrolysis of cytotoxic pyronins in micellar systems, 75

Laser photolysis
intrazeolite photochemistry
laser photolysis of stilbene and some aromatic hydrocarbons in the cavities of NaX studied by time-resolved diffuse reflectance, 91
Lewis acid
stereoselective photodimerization of $SnCl_4$ complexes of cyclic α,β-unsaturated ketones in the solid state, 51
Light energy
kinetic study of the direct and photosensitized photoisomerization of acetoxyisopiperitenone: solvent effect and evaluation for the photochemical storage of light energy, 41
Luminescence
low temperature luminescence study of the colored merocyanine form of substituted 6-nitrobenzospiropyrans, 319
Luminol
luminol chemiluminescence in micellar media, 237

Maleic–fumaric acid system
photochemistry of the maleic–fumaric acid system in aqueous solution at 254 nm, 13
Mechanism
photodecarboxylation: mechanism and synthetic utility, 135
o-Methyl dibenzyl ketone
competition between δ-hydrogen abstraction and cage effects in the photochemistry of *o*-methyl dibenzyl ketone in various environments, 57
Methyl methacrylate
photopolymerization of methyl methacrylate in carbon tetrachloride solution using 4-isopropyl-4′-*N*,*N*-dime-

thylaminobenzophenone as chromophore, 353
spectroscopic and photoreduction study of 2-acryloxy thioxanthone: photoinitiation activity of methyl methacrylate polymerization, 255
Methyl viologen
photochemical reduction of carbon dioxide by trichlorobis (2,2′:6′,2″-terpyridyl)vanadium(III) and methyl viologen, 67
Methylviologen
effects of colloid stabilizer and pH on photoinduced electron transfer from colloidal titanium dioxide to methylviologen, 101
Micellar media
luminol chemiluminescence in micellar media, 237
Micellar systems
kinetics of the hydrolysis of cytotoxic pyronins in micellar systems, 75

6-Nitrobenzospiropyrans
low temperature luminescence study of the colored merocyanine form of substituted 6-nitrobenzospiropyrans, 319

Organometallic complex
photofixation of carbon dioxide by a hydroxo-oxobis(8-quinolyloxo)-vanadium(V)-MV^{2+}–ethylendiaminetetraacetic acid dispersion system, 329
Oxygen
chemiluminescence in the gas phase reaction between tetrakis (dimethylamino) ethylene and oxygen, 1
photo-oxidation of propionic acid by oxygen in the presence of TiO_2 and dissolved copper ions, 337

Photo-oxidation
photo-oxidation of propionic acid by oxygen in the presence of TiO_2 and dissolved copper ions, 337
Photo-oxygenation
photophysical properties and photo-oxygenation of 2-(4-ethoxycarbonylphenyl)-1,8-dihydropyrrolo[3′,2′:3,4]-cyclopenta[1,2-b]pyridine (EPCP), 227
Photoaddition
photochemistry of the maleic–fumaric acid system in aqueous solution at 254 nm, 13
Photocatalytic reduction
photocatalytic reduction of N_2 to NH_3 sensitized by the [Ru^{III}–ethylenediaminetetraacetate–2,2′-bipyridyl]$^-$ complex in a Pt–TiO_2 semiconductor particulate system, 349
Photocatalytic membranes
degradation of some chloro-aliphatic water contaminants by photocatalytic membranes immobilizing titanium dioxide, 109
Photodecarboxylation
photodecarboxylation: mechanism and synthetic utility, 135
Photodimerization
stereoselective photodimerization of $SnCl_4$ complexes of cyclic α,β-unsaturated ketones in the solid state, 51
Photofixation
photofixation of carbon dioxide by a hydroxo-oxobis(8-quinolyloxo) vanadium(V)-MV^{2+}–ethylendiaminetetraacetic acid dispersion system, 329
Photogeneration
photosolvolysis of 5-substituted dibenzosuberol derivatives: a stereoelectronic requirement for carbocation photogeneration, 33
Photoinduced electron transfer
effects of colloid stabilizer and pH on photoinduced electron transfer from colloidal titanium dioxide to methylviologen, 101
photoinduced electron transfer via benzoquinone as evidenced by chemically induced dynamic nuclear polarization, 279
Photoinitiation
alternating phototerpolymerization of zinc acrylate, styrene and acrylonitrile initiated by the As_2S_3–styrene complex, 363
spectroscopic and photoreduction study of 2-acryloxy thioxanthone: photoinitiation activity of methyl methacrylate polymerization, 255
Photoisomerization
kinetic study of the direct and photosensitized photoisomerization of acetoxyisopiperitenone: solvent effect

and evaluation for the photochemical storage of light energy, 41
photochemistry of the maleic–fumaric acid system in aqueous solution at 254 nm, 13
photophysical properties and photoisomerization of aza derivatives of *trans*-2-styrylnaphthalene: *trans*-1-(2-pyrazinyl)-2-(*n*-quinoxalinyl)ethylene, 23
Photopolymerization
alternating phototerpolymerization of zinc acrylate, styrene and acrylonitrile initiated by the As_2S_3–styrene complex, 363
photopolymerization of methyl methacrylate in carbon tetrachloride solution using 4-isopropyl-4′-*N*,*N*-dimethylaminobenzophenone as chromophore, 353
Photoreduction
spectroscopic and photoreduction study of 2-acryloxy thioxanthone: photoinitiation activity of methyl methacrylate polymerization, 255
Photosensitization
reduction of dioxygen to superoxide photosensitized by anthraquinone-2-sulfonated, 187
Photosensitizer
photocatalytic reduction of N_2 to NH_3 sensitized by the [Ru^{III}–ethylenediaminetetraacetate–2,2′-bipyridyl]$^-$ complex in a Pt–TiO_2 semiconductor particulate system, 349
Photosolvolysis
photosolvolysis of 5-substituted dibenzosuberol derivatives: a stereoelectronic requirement for carbocation photogeneration, 33
Propionic acid
photo-oxidation of propionic acid by oxygen in the presence of TiO_2 and dissolved copper ions, 337
Protonation
experimental and INDO CI calculations of the electronic absorption spectra of acridine and 9-acridinamine free bases and their protonated forms with regard to tautomeric phenomena, 287
Pyridinium di-μ-oxo-bis(oxo tris(isothiocyanate)molybdate(V))
flash photolysis of pyridinium di-μ-oxo-bis(oxo tris(isothiocyanate) molybdate(V)) in ethyl acetate, 267
pH
effects of colloid stabilizer and pH on photoinduced electron transfer from colloidal titanium dioxide to methylviologen, 101
Quenching
nonradiative decay lifetime standards, 167
Reduction
photochemical reduction of carbon dioxide by trichlorobis(2,2′:6′,2″-terpyridyl)vanadium(III) and methyl viologen, 67
reduction of dioxygen to superoxide photosensitized by anthraquinone-2-sulfonate, 187
Semiconductor
spectral sensitization of a semiconductor by mixtures of aggregated cyanine dyes: photoelectrochemical study, 377
Semiconductor particulate system
photocatalytic reduction of N_2 to NH_3 sensitized by the [Ru^{III}–ethylene-diaminetetraacetate–2,2′-bipyridyl]$^-$ complex in a Pt–TiO_2 semiconductor particulate system, 349
Singlet oxygen
photophysical properties and photo-oxygenation of 2-(4-ethoxycarbonylphenyl)-1,8-dihydropyrrolo[3′,2′:3,4]-cyclopenta[1,2-b]pyridine (EPCP), 227
Solubilization
solubilization and photophysical and photochemical behaviour of depsides and depsidones in water and Brij-35 solutions at different pH values, 245
Spectral sensitization
spectral sensitization of a semiconductor by mixtures of aggregated cyanine dyes: photoelectrochemical study, 377
Spectroscopy
spectroscopy and photoreduction study of 2-acryloxy thioxanthone: photoinitiation activity of methyl methacrylate polymerization, 255
Spiranic carbon atom
photophysical study of some indole derivatives, 301
Stereoselectivity
stereoselective photodimerization of $SnCl_4$ complexes of cyclic α,β-unsaturated ketones in the solid state, 51

Stilbene
intrazeolite photochemistry; laser photolysis of stilbene and some aromatic hydrocarbons in the cavities of NaX zeolite studies by time-resolved diffuse reflectance, 91
Styrene
alternating phototerpolymerization of zinc acrylate, styrene and acrylonitrile initiated by the As_2S_3–styrene complex, 363
Superoxide
reduction of dioxygen to superoxide photosensitized by anthraquinone-2-sulfonate, 187
Synthetic utility
photodecarboxylation: mechanism and synthetic utility, 135

Tautomeric phenomena
experimental and INDO CI calculations of the electronic absorption spectra of acridine and 9-acridinamine free bases and their protonated forms with regard to tautomeric phenomena, 287
Tetrakis(dimethylamino)ethylene
chemiluminescence in the gas phase reaction between tetrakis (dimethylamino) ethylene and oxygen, 1
Titanium dioxide
degradation of some chloro-aliphatic water contaminants by photocatalytic membranes immobilizing titanium dioxide, 109
effects of colloid stabilizer and pH on photoinduced electron transfer from colloidal titanium dioxide to methylviologen, 101
photo-oxidation of propionic acid by oxygen in the presence of TiO_2 and dissolved copper ions, 337
Trans-2-styrylnaphthalene
photophysical properties and photoisomerization of aza derivatives of *trans*-2-styrylnaphthalene: *trans*-1-(2-pyrazinyl)-2-(*n*-quinoxalinyl)ethylene, 23
Trichlorobis(2,2′:6′2″-terpyridyl)vanadium (III)
photochemical reduction of carbon dioxide by trichlorobis(2,2′:6′,2″-terpyridyl)vanadium(III) and methyl viologen, 67

Zeolite
intrazeolite photochemistry; laser photolysis of stilbene and some aromatic hydrocarbons in the cavities of NaX zeolite studied by time-resolved diffuse reflectance, 91
Zinc acrylate
alternating phototerpolymerization of zinc acrylate, styrene and acrylonitrile initiated by the As_2S_3–styrene complex, 363
